

THE REPLACEMENT EXPERTS

We have been offering outstanding quality and value across windows, doors and all other replacement products since 1983.

10 Year Guarantee

Replica Wood lasts considerably longer than normal wood and has a 10 year Guarantee.

Money Saving

Replica wood is low maintenance. No more regular expensive refurbishment.

Authentic Wood Grains

Manufactured to a high quality, using textured grains identical to natural oak.

Lightweight

Weighing approximately 1 kg per metre, our Replica Oak Tudor Boards are easy to manoeuvre and install.

Tudor Style

Takes your home back to the distinct, sharp Tudor style.

Weather Resistant

Unlike normal wood, which suffers considerably at the hands of lashing rain and harsh winters, Replica Wood Shiplap Cladding is hardly affected.

Western Red Cedar Grain

Manufactured to a high quality using textured grains identical to Western Red Cedar. An authentic wood appearance unlike any other plastic/composite alternative.

Improves Appearance and Adds Value

Adds new life to the outside of your home, making it more attractive and helping it stand out for potential buyers.

Low Maintenance

Made with Polyurethane, a hard wearing, durable, long lasting material.

Authentic Colours

Available in a range of distinct, Tudorstyle Colours. Custom colours manufactured to order, please ask for details.

Seamless Installation

Using our specially designed fixing clips, we have developed a seamless installation process that keeps all fixings hidden.

REPLACEMENT SOFFITS, FASCIAS AND GUTTERS

We have over 37 years experience in installing high quality, durable and weatherproof fascias and soffits. So whether you're looking to add value to your home with a brand new wood grain effect fascia, or replace damaged and worn out soffits, you can be assured we will provide a thorough service with expert workmanship.

It can be easy to overlook your roofline, but fascias and soffits are an essential part of your property. Our fascias and soffits are one of our specialities, and our expert installers have the expertise required to ensure that the roof on your home always remains in top condition.

Fascias and soffits are the wooden boards surrounding your roofline, both around the front, sides and underneath the eaves.

Over time they can crack and the paint may peel away. We will free you from the burden of having to repaint your fascias and soffits by replacing them with high quality cellular uPVC fascias and soffits in white or a full range of wood grain finishes.

- No sanding down or painting over
- 100% maintenance free
- Improve the appearance of your home
- Safer than wood with a Class 1 fire rating
- Add value to your home
- Choose from a selection of colours
- Installed by expert fitters

Where feasible, Window Centre will always replace old fascias and never clad over existing and old fascia boards.
